

TVCL - Ground Marks Summary 2019**Notes:**

For some time there has been concern about marking by some home teams which unduly favour their own grounds. To take an extreme example, we found in 2018 that one club's visitors awarded marks that were, on average, only 53% of what the home club recorded. Therefore the Management Committee has decided that, rather than taking a simple average of team marks which could favour the home marking by 9:1, the 2018 marks will be based on an adjusted average.

This Adjusted Average is calculated using all away teams' marks plus a home team average mark which it is hoped will give a truer picture of ground standards.

The wealth of statistics that can now be produced from the League's system will enable us to identify and approach those few clubs whose marks suggest that, for whatever reason, they are being too generous to themselves.

Range: This uses the principle that, in any set of results, it is expected that there will be a 'normal' range of numbers grouped either side of the overall average. It is therefore possible to identify those results which are outside this 'Standard Deviation'. We have done this here and the green highlighting indicates a better than normal (i.e. 'Good') result while those which are worse than expected have an orange highlight.

All average marks are based on the 1 - 5 scoring system introduced in 2019. In previous years the range was 1-6.

Average		3.719	3.813			4.319	3.703
